FAX-T98

The FAX-T98
Elegant fax with
hands-free calling and
digital answering machine

•:•••• **always** at **your** side

FAX-T98

The FAX-T98 from Brother not only looks good, it performs with style too.

With its smooth contours and ice blue trim, the FAX-T98 has been stylishly designed to blend in to the modern office or home whilst retaining all the performance you would expect from a Brother machine.

Simplicity is key to the control panel with large dial keys and navigation buttons. The backlit display panel makes everything easy to read, with easily identifiable icons showing the fax status, including 'consumable running low' and 'message in memory'. A navigation dial puts you in total control and enables you to scroll through the machine's functions and phonebook with ease.

Incoming faxes are received on standard A4 plain paper, at both the quality and speed you expect thanks to a modem speed of 14,400 bps. The machine can hold up to 30 sheets and has a 10 sheet automatic document feeder for increased efficiency. Should the machine ever run out of paper there is ample memory to store up to 25 pages so that vital information will never be lost.

With the benefit of advanced fax features, FAX-T98 can save you time and money, for example, you can send the same document to several recipients without laborious re-scanning, or store several documents to memory and then automatically send during off-peak call times.

The FAX-T98 includes an integrated telephone handset that enables hands-free dialling and speaking for added convenience. There is also a digital answer machine that can store up to 15 minutes of messages, which are displayed clearly on the control panel.

Incoming calls are also displayed on the control panel**. There is a choice of four 'on-hold' melodies, therefore adding a more professional touch to your business calls.

There is even a copy facility that will produce up to 99 copies with standard, fine, superfine and photo resolution modes. It adds to the already impressive range of features housed in the FAX-T98.

*ITU-T No.1 Chart, (in Out of Paper Reception in ECM mode)
**Caller ID can be purchased from the telephone company

Technical Specifications

General
Plain paper thermal transfer fax
10 sheet auto document feeder (ADF)
